ERP Made Easy

Who We Are.

Hedion Systems helps businesses simplify operations through Odoo ERP, custom software, automation and system integration.

We build technology around real business processes, helping teams work with greater clarity, control and efficiency.

Our Vision

To help businesses operate smarter through connected, scalable and practical technology.

Our Mission

To transform complex business processes into simple, efficient digital systems that support long-term growth.

How We Think

Business First. Technology Second.

We understand the workflow before
building the solution.

Every system is shaped around actual
operational needs rather than
unnecessary complexity.

Core Values.

CLARITY

Keep systems simple and understandable.

IMPROVEMENT

Keep refining systems as businesses evolve.

RELIABILITY

Build solutions businesses can depend on.

ADAPTABILITY

Create technology around individual requirements.

OWNERSHIP

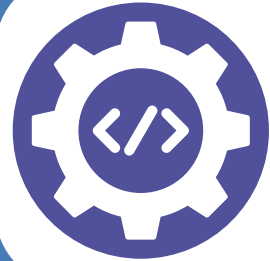

Stay involved beyond implementation.

Our Services

Odoo ERP

Connected business management through one platform.

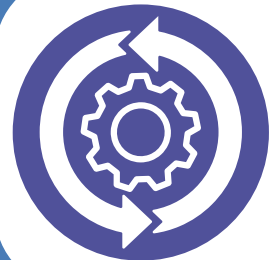

Custom Development

Modules, workflows, dashboards, reports and portals.

Odoo Support

Technical support, maintenance and optimization.

FBR Integration

Connect Odoo with FBR Digital Invoicing.

Odoo Implementation

Configuration, migration, testing, training and deployment.

System Integrations

Connect Odoo with external platforms and applications.

Dedicated Experts

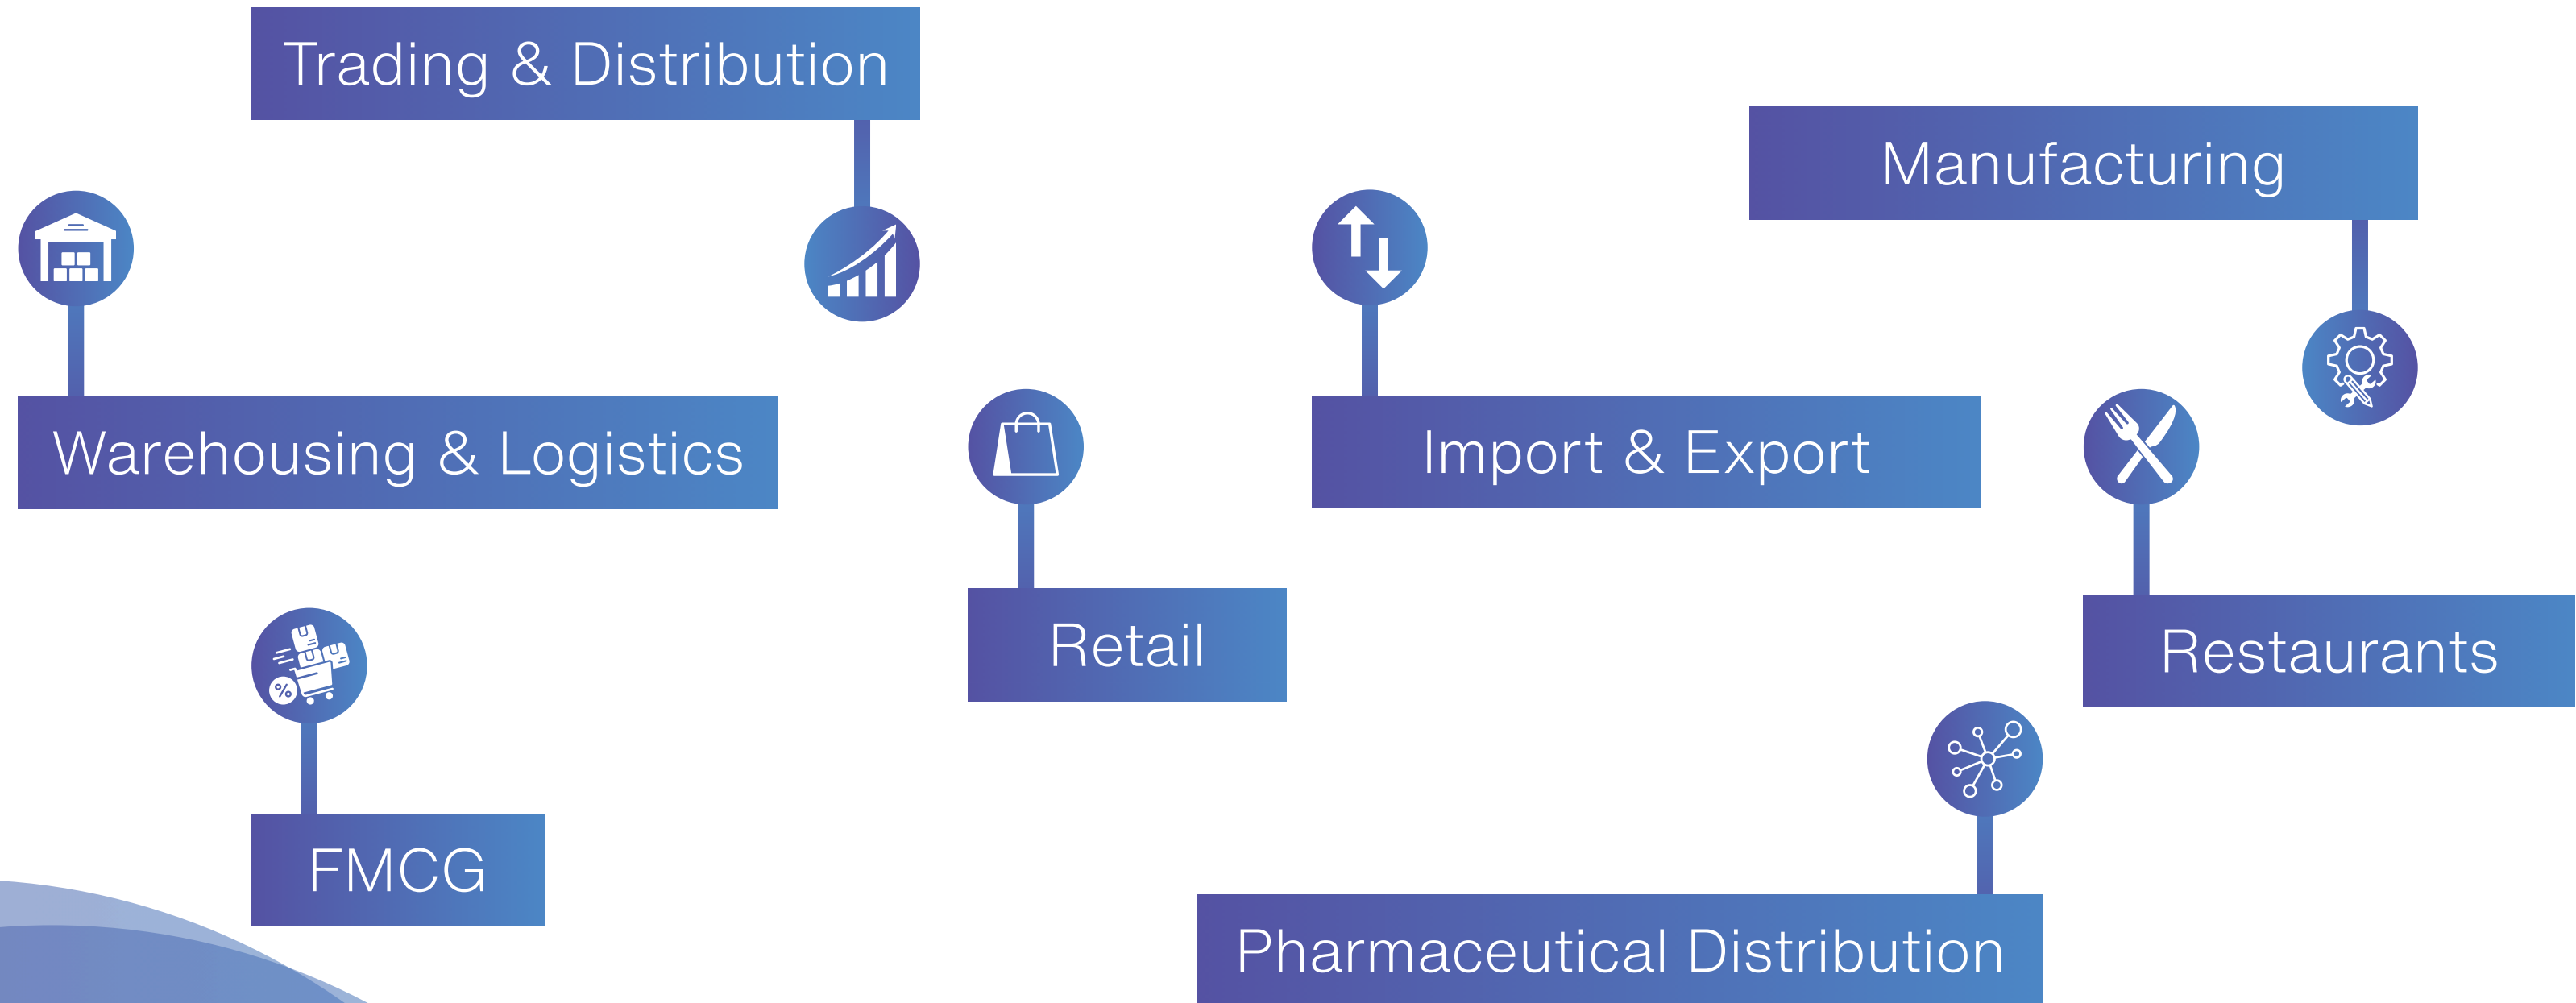

Access functional consultants, developers, analysts and QA professionals.

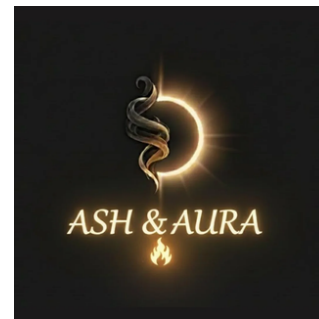

Custom Software

Purpose-built applications for specialized business needs.

Industries We Serve

Clients.

The Hedion Promise

Technology that fits the business.

We focus on understanding operations, reducing unnecessary manual work and building systems teams can confidently use every day.

Our Expertise

FUNCTIONAL CONSULTING

Translate business requirements into practical ERP workflows.

DEVELOPMENT

Build customized modules, integrations and applications.

BUSINESS ANALYSIS

Identify operational challenges before designing solutions.

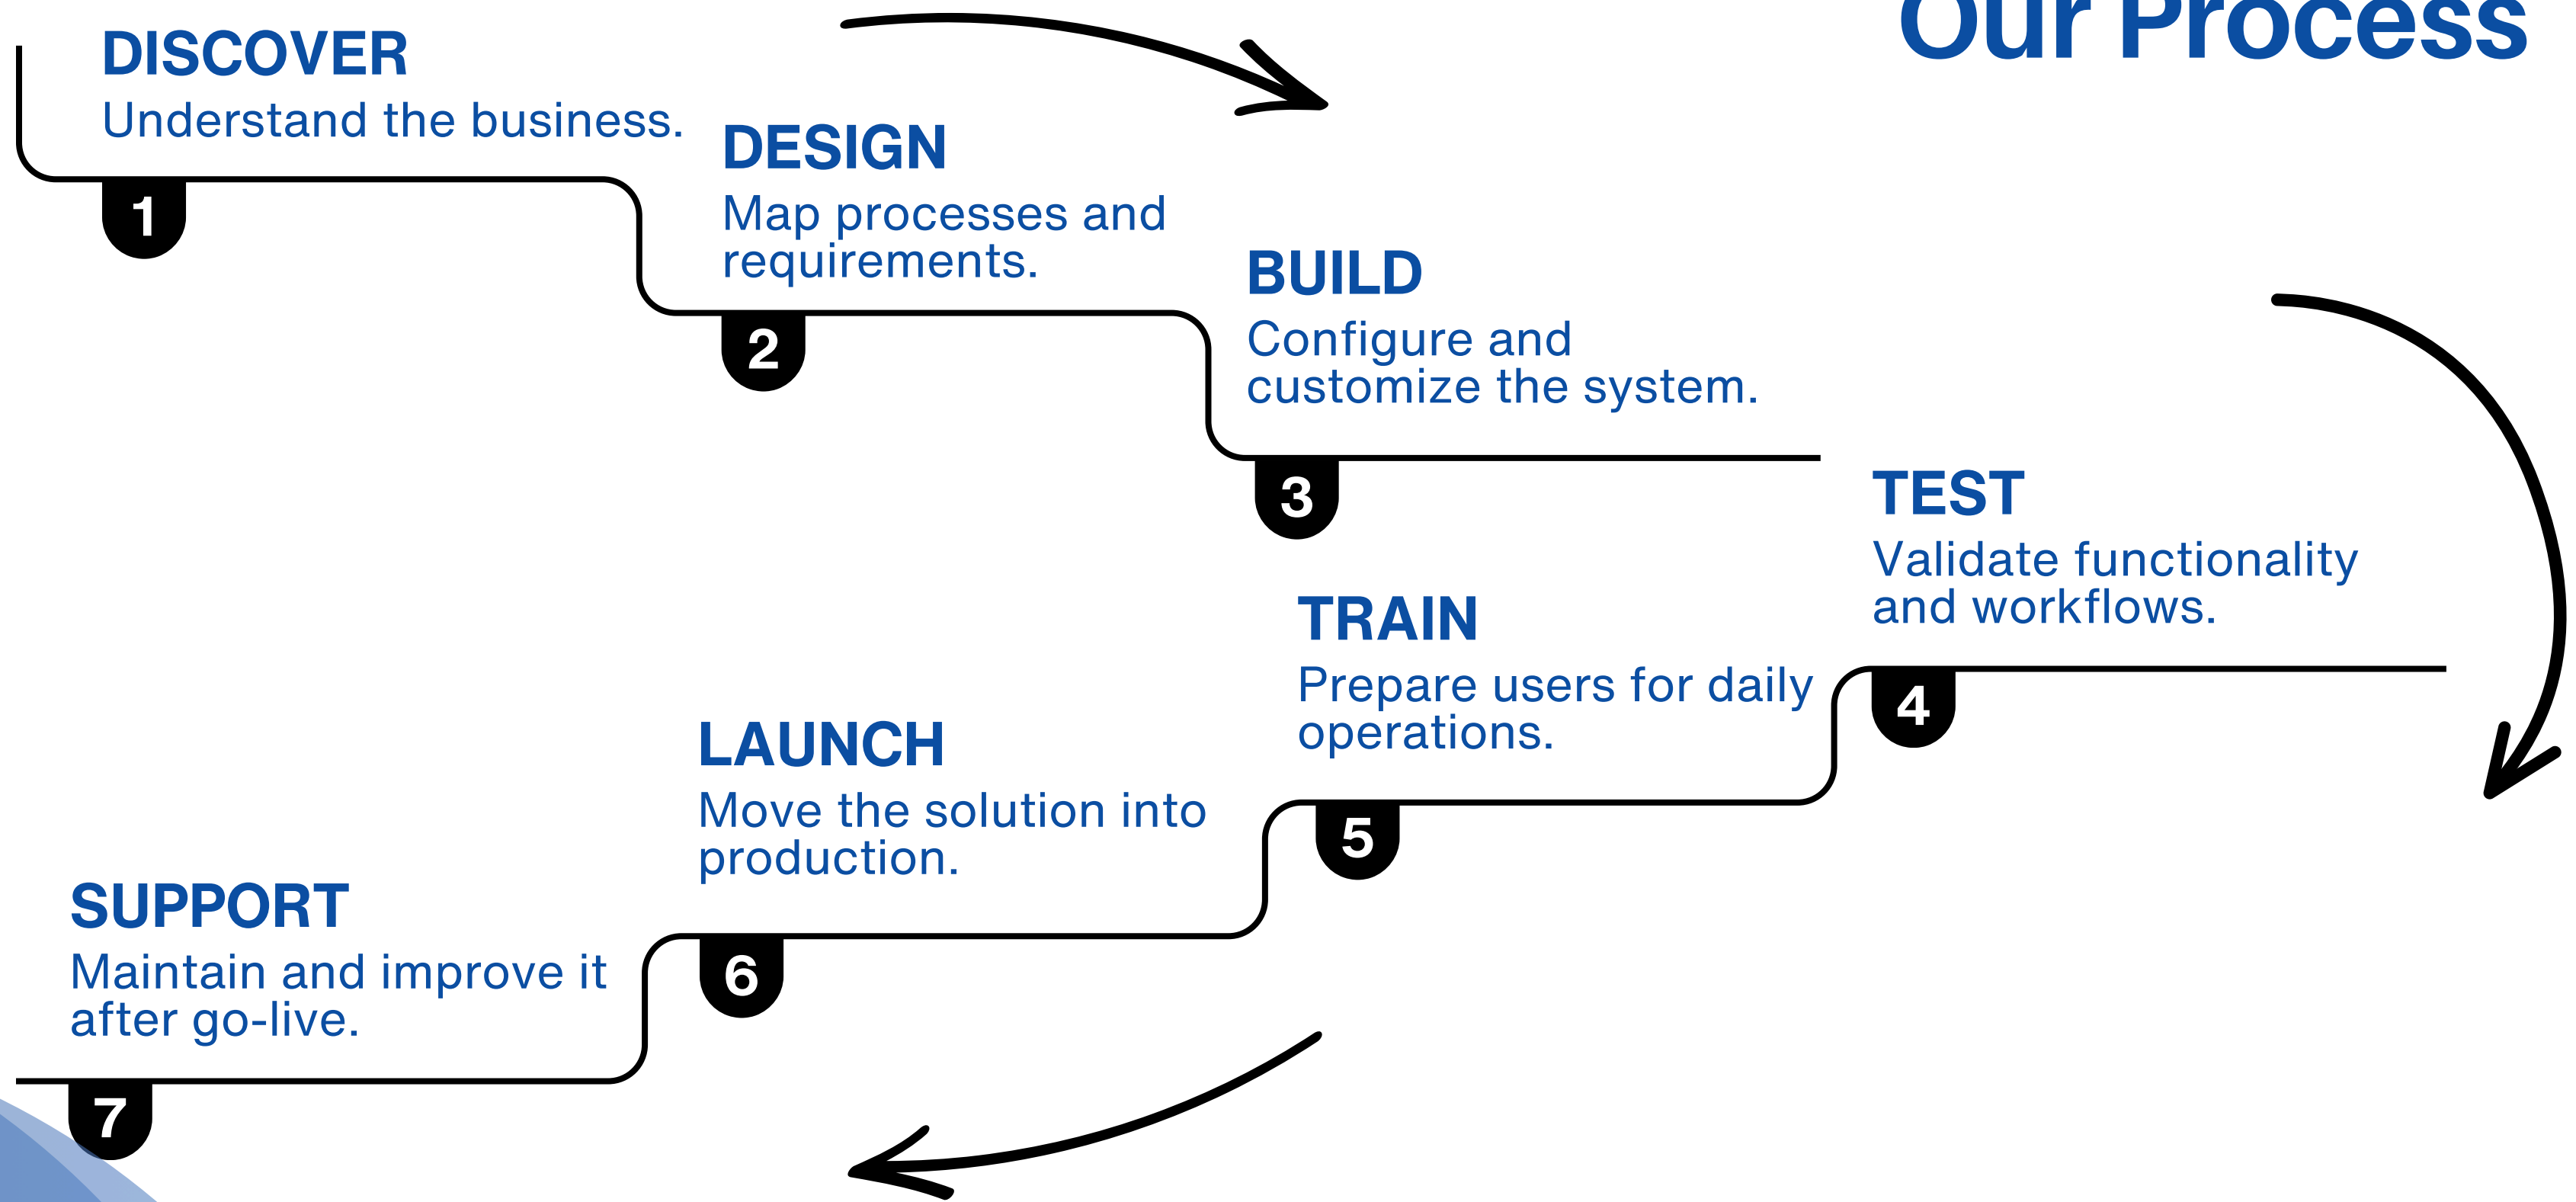

PROJECT MANAGEMENT

Keep implementation structured and controlled.

QUALITY ASSURANCE

Test systems before they reach daily operations.

Our Process

Odoo Implementation

We help businesses implement Odoo around their actual workflows.

Services:

- Requirement analysis
- Odoo configuration
- Data migration
- Module setup
- User training
- Go-live assistance

Custom Odoo Development

Extend Odoo beyond standard functionality.

Services:

- Custom modules
- Workflow automation
- Dashboards
- Reports
- APIs
- Customer and vendor portals

Smart Integrations

Connect Odoo with the systems your business already uses.

We help reduce duplicate work and create a smoother flow of information between platforms.

Odoo Care & Support

Keep your ERP reliable after implementation.

Services:

- Technical support
- Functional support
- Bug fixes
- System maintenance
- Performance monitoring
- User assistance

Dedicated Odoo Experts

Extend your team with experienced:

1. Odoo Developers
2. Functional Consultants
3. Business Analysts
4. Project Managers
5. QA Specialists

Available for dedicated or project-based requirements.

FBR Digital Invoicing

Integrate Odoo with Pakistan's FBR Digital Invoicing environment. Automate invoice submission, validation and compliance processes directly through your ERP.

Odoo Upgrades

Move your Odoo environment forward while protecting business continuity, data and customized workflows.

Launch & Deployment

Prepare your system for production through:

- Server Setup
- Security Configuration
- Testing
- Backup Setup
- Go-Live Support

Odoo Apps & Extensions

Custom Odoo solutions across:

- CRM
- Sales
- Purchase
- Inventory
- HR
- Manufacturing
- POS
- Operations

Business Analysis & Consultation

We study existing processes before recommending technology.
The goal is to solve the right business problem before development begins.

Business Solutions

Odoo ERP

Manage core business operations through one connected platform.

FMCG Distribution Management System

A system that manages FMCG sales, stock, orders, and distribution.

Wholesale Management System

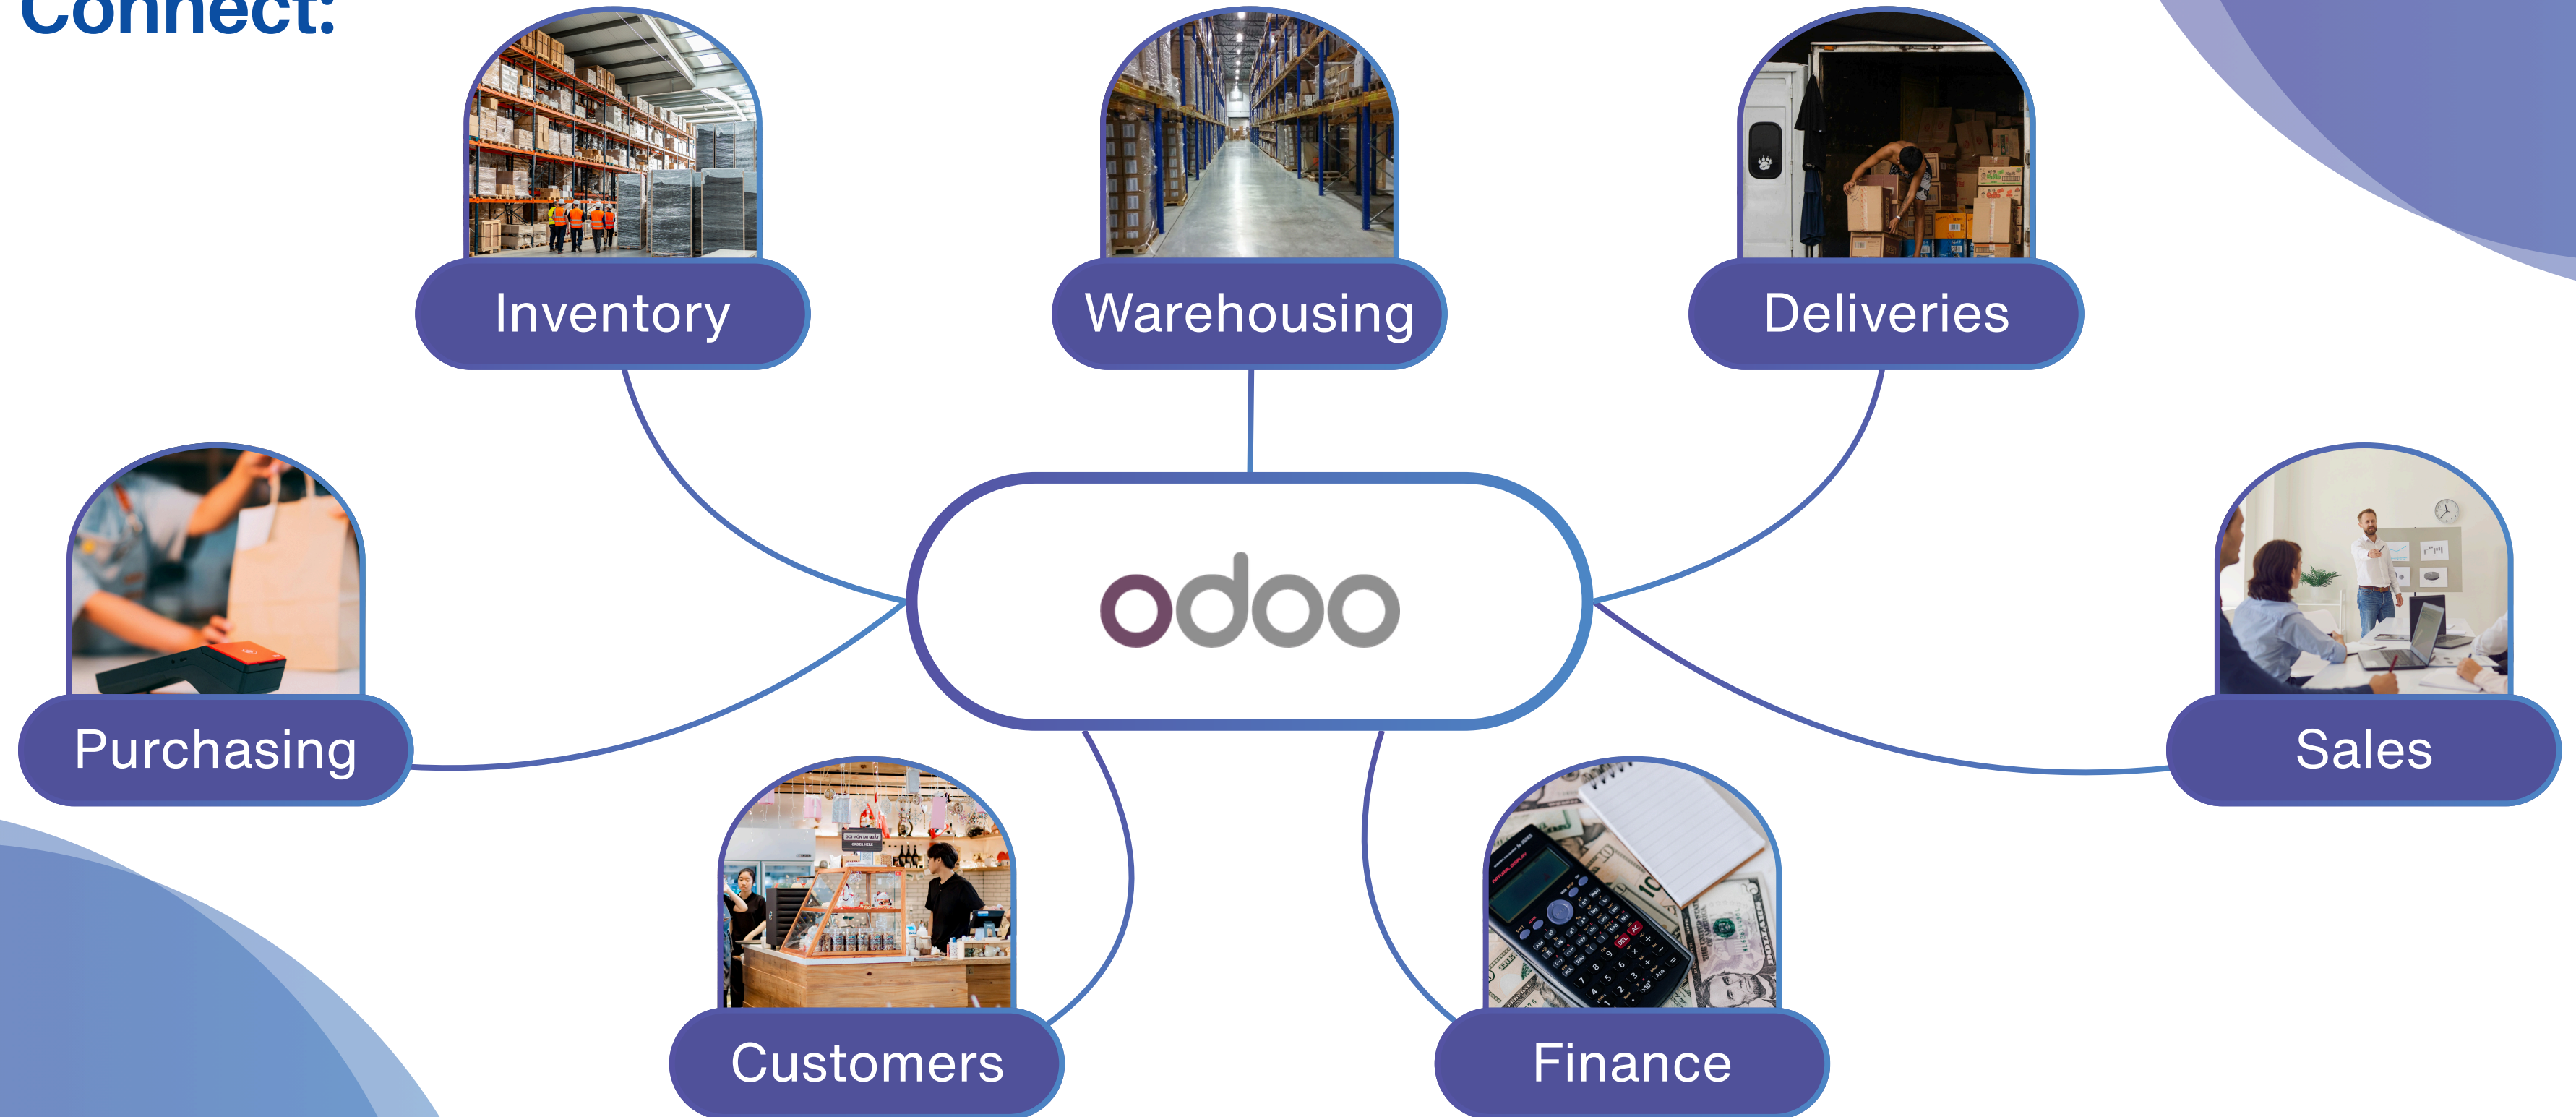

Manages wholesale sales, stock, and orders.

Point of Sale

Connect sales, customers and inventory.

Trading & Distribution Solutions

Connect:

Custom Solutions

1

Pharmacy Management System

Manage inventory, sales, purchases, suppliers, and customer records from one platform. Track stock levels, expiry dates, and daily pharmacy operations with ease.

2

Attendance & Payroll Management System

Track employee attendance, working hours, leaves, and overtime accurately. Automate payroll calculations and simplify your HR and salary management.

3

Salon Management System

Manage appointments, customers, staff, services, and payments in one place. Keep your salon operations organized while improving customer service.

4

Restaurant Management System

Manage orders, tables, menu items, inventory, and billing efficiently. Get better control over daily restaurant operations and sales.

5

Retail Management System

Manage products, inventory, sales, purchases, customers, and suppliers in one system. Get real-time insights into your retail business and keep your operations organized.

6

Aesthetic Clinic Management System

Manage appointments, patients, treatments, staff, and payments with ease. Keep treatment records organized and streamline your clinic operations.

Why Hedion

- Business-focused approach
- Strong Odoo expertise
- Custom development capability
- Integrated systems
- Flexible technical resources
- Long-term support

Managed Services

Support your business after launch through:

ERP Support

Technical Maintenance

Training

Functional Assistance

Performance Monitoring

Dedicated Resources

Our Commitment

We build systems that make daily operations easier to understand, manage and improve.
Technology should reduce complexity, not create more of it.
